

G-Smart Link 50

Barcode Stock Management For Sage 50

Take Sage 50 to the next level

From the moment you receive supplies to the time orders leave your premises, G-SMart Link 50 software will track and manage your inventory. Simple integration with Sage 50 and a range of optional features, turns your Sage 50 into a fully functioning inventory management system - without the complexity and expense of an enterprise solution.

Seamless Integration

Expand Sage 50 capabilities to include inventory management and barcode tracking without disruption to your current system and operations.

Designed by Sage approved developers. G-SMart Link 50 expands your Sage 50 system into a fully functioning warehouse and operations solution with seamless integration to your current system. A simple solution for small to medium businesses.

Barcode Stock Control

Eliminate manual count mistakes and speed up operations with barcode tracking via G-SMart Link 50 software.

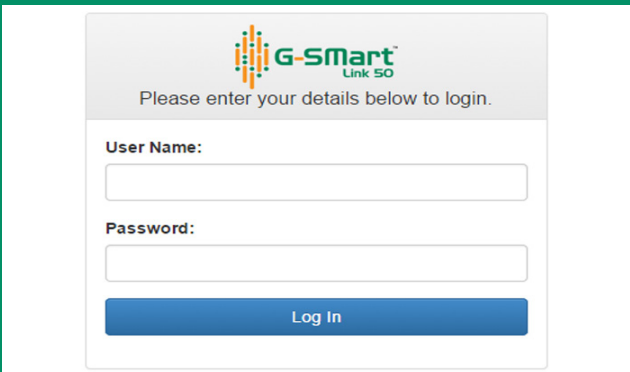

- Quick and accurate stock takes
- Reduce stock holding and free up cash
- Manage stock in multiple locations
- Tracks inventory in real time

Integrates with Sage reporting for improved decision making and informed customer service.

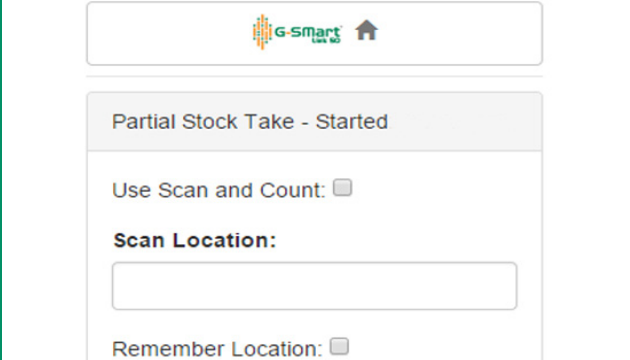

BOM, Batch & Serial Track

For more complex business operations expand your G-SMart link 50 with specialist modules:

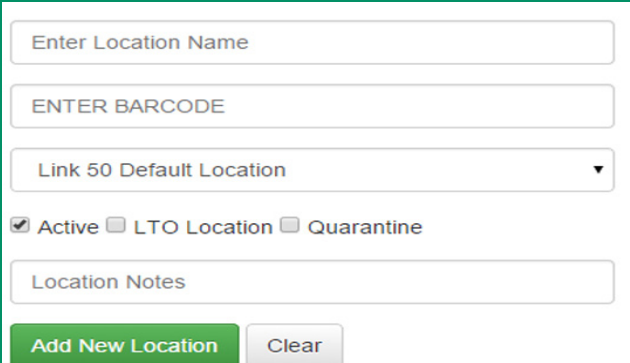

- Process Bill of Materials (BOM) via scanners
- Track Sage BOM's across multiple locations
- Batch traceability of suppliers and customers
- Manage and process complex operations
- Record serial numbers against receipts
- Report on transaction history of serial items
