

G-Smart Link 50

Barcode Stock Management for Sage 50

Take Sage 50 to the next level

From the moment you receive supplies to the time orders leave your warehouse, G-SMart Link 50 software will track and manage your inventory. Simple integration with Sage 50 and a range of modular features, turn your Sage 50 into a fully functioning inventory management system - without the complexity and cost of an enterprise solution.

Seamless Integration

Designed by Sage approved developers, G-SMart Link 50 expands your Sage 50 system into a fully functioning warehouse and operations solution with seamless data integration.

The simple add-on, expands Sage 50 capabilities to include inventory management with barcode tracking across devices without disruption to your current system and business operations.

Barcode Stock Control

Eliminate manual count mistakes and speed up locating and processing stock with barcode scanning and tracking in G-SMart Link 50.

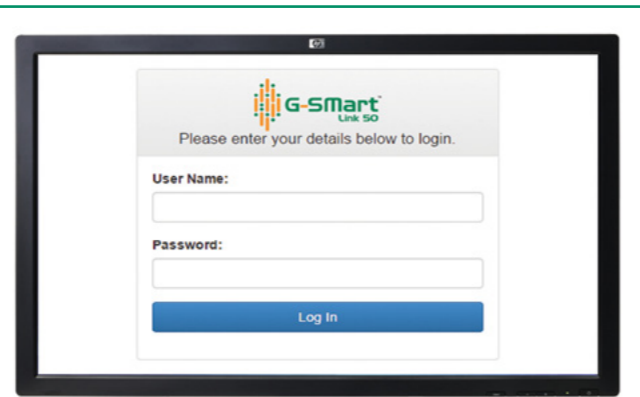

- Manage stock in multiple locations
- Run quick and accurate stock takes
- Track inventory in real time
- Improve stock turnover and reduce wastage

Integrates with your Sage reporting for improved decision making and informed customer service.

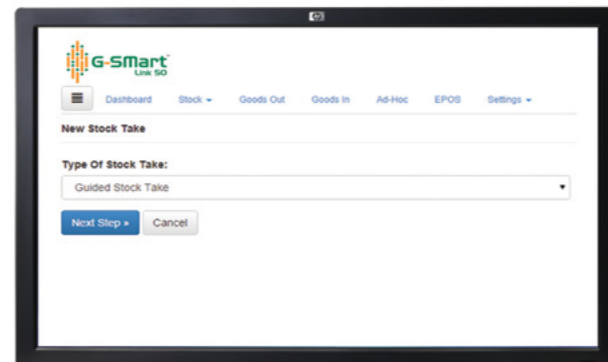

BOM, Batch & Serial Track

For more complex business operations, including light assembly and manufacturing, expand your G-SMart link 50 with additional modules:

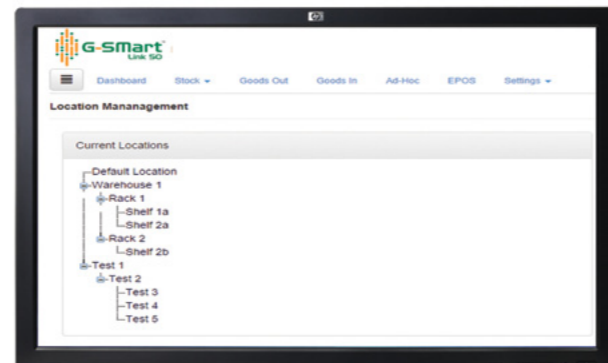

- Bill of Materials (BOM) - assembly via barcode scanning and track across multiple locations
- Batch Tracking - track products back to source
- Serial Numbers - track against receipts and report on movement history of serial items

Log on from any device

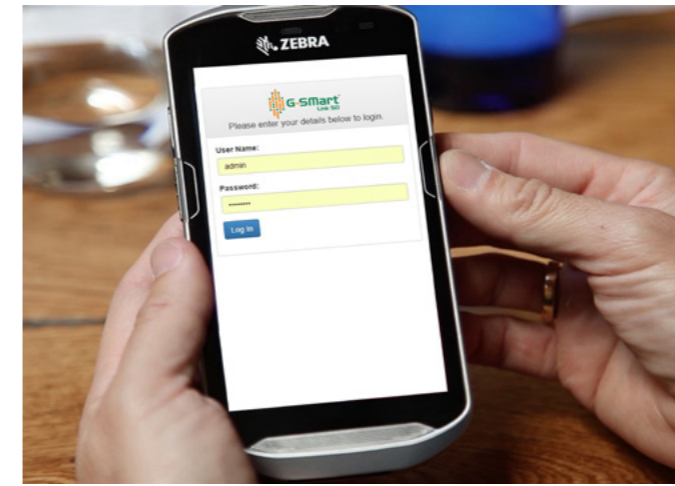

Stock takes - in real time!
