

G-Smart Stock

Barcode Stock Control System

Barcode and Track Stock on the Move

No more pen and paper stock-takes and no more updating spreadsheets! Know what stock you have and where, instantly with G-Smart Stock - the easy to use barcoding system. Developed for barcode tracking and processing on the move and across multiple locations, the G-Smart Stock software boosts productivity, accuracy and reporting across devices.

Accuracy & Efficiency

Incorporating barcoding into your business will revolutionise your business operations, delivering accuracy, efficiency and improved reporting.

In an increasing data-driven, and connected business environment, barcode scanning and tracking deliver a competitive advantage where costs savings and improved customer service increase your business profitability.

Mobile Stock Control

Work wirelessly across multiple locations scanning and processing stock on the move using industrial mobile computers, tablets or consumer devices.

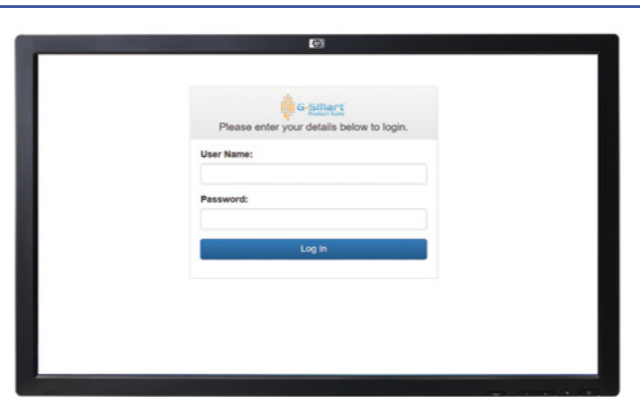

- Manage stock in multiple locations
- Run quick and accurate stock takes
- Track inventory in real time
- Improve stock turnover and reduce wastage

G-Smart Stock eliminates manual entry mistakes and speeds up your operations with total accuracy.

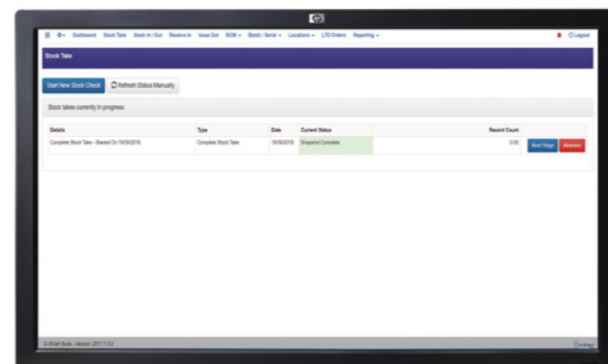

BOM, Batch & Serial Track

For more complex business operations, including light assembly and manufacturing, expand your G-Smart Stock with specialist modules:

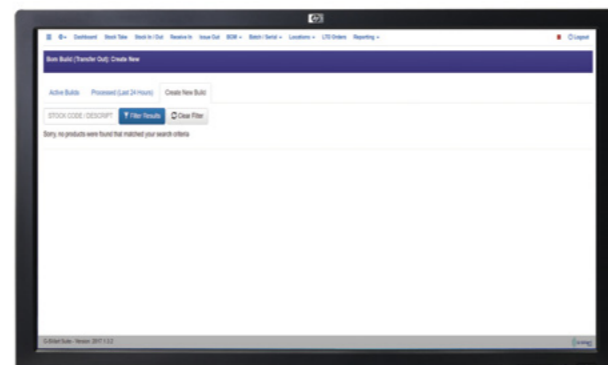

- Bill of Materials (BOM) - assembly via barcode scanning and tracking across locations
- Batch Tracking - track products back to source
- Serial Tracking - track against receipts and report on movement history of serial items.
