

TOTAL BARCODING SOLUTIONS

SOFTWARE, MAINTENANCE & REPAIRS

To enable you to design and print your own unique labels in-house we offer **Bartender** label printing software. This is ideal for small businesses that need to quickly and easily generate labels incorporating variable data from Excel or CSV files. It can also be used for companies wishing to centrally control printing and integrate with their systems such as SAP and Dynamics 365.

Mitigate security risks and tackle maintenance challenges at every stage of the device life cycle with **SureMDM™** mobile device management. Allowing for remote control and greater management of mobile devices securely and efficiently, SureMDM™ enables businesses to streamline their device management processes, saving time, lowering maintenance costs.

GSM Barcoding's **Support Contracts** keep your operations running at peak performance with manufacturer approved support contracts for service and warranty repairs to your printers, scanners and mobile computers, reducing business downtime should a fault occur.

Our Support Contracts can be bespoke to your requirements, however should your hardware be out of warranty we can still organise repairs or replacement products. Specialists in printer support contracts, our engineers provide reliable on-site or back to base support to suit your business needs.

PRINTERS, SCANNERS & MOBILE COMPUTERS

GSM Barcoding has decades of experience working with the leading hardware manufacturers at the forefront of barcode developments. From handheld scanners and thermal transfer printers to the latest mobile computers, our technical sales team can advise you on the latest barcode technology to suit your particular application.

- **Mobile, Desktop and Industrial printers**
- **RFID-ready printers and readers**
- **Corded and cordless barcode scanners**
- **Rugged mobile computers and tablets**
- **Vehicle mounted IT solutions**

Barcode hardware technology is constantly advancing and improving and with so many manufacturers to choose from, the task of specifying and selecting the right technology for your industry and application can be challenging. Speak with our team of experts now and choose the right barcoding technology, first time.

SPECIALIST LABELS & TAGS

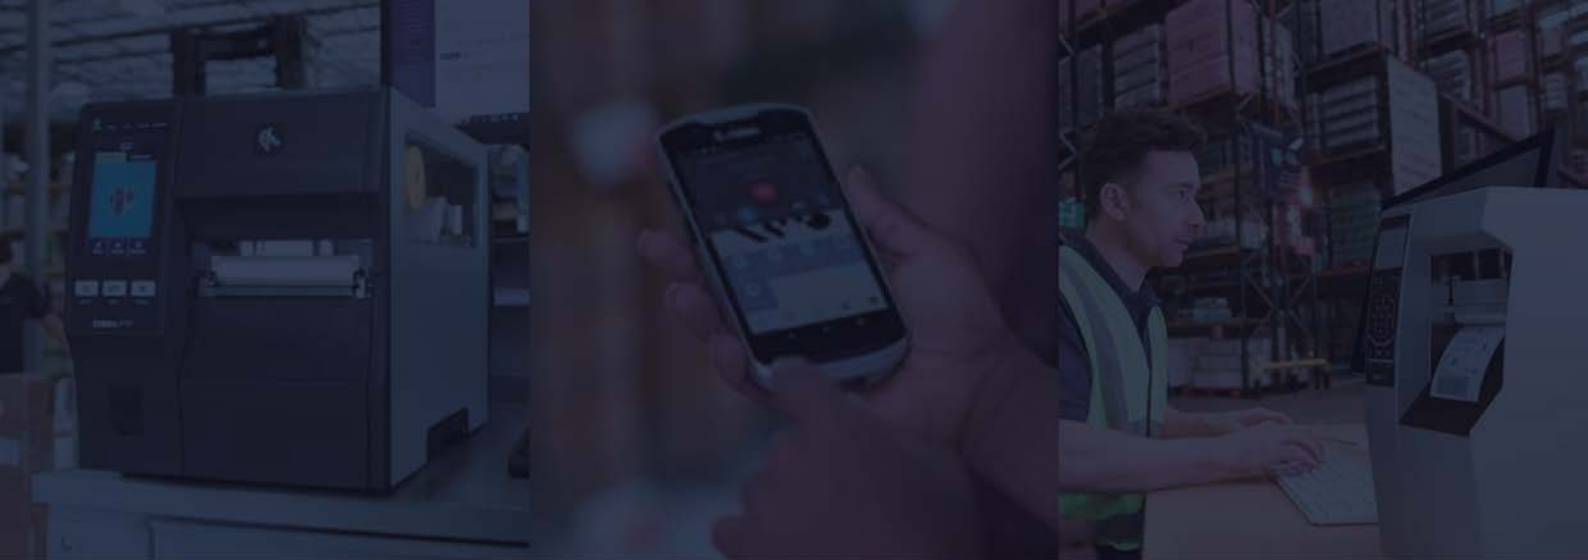

GSM Barcoding offers a comprehensive range of printable paper and synthetic stock for any labelling application, available on rolls, sheets, stacks or as individual tags. We can also supply the most suitable thermal transfer ribbons for your selected label material. Our pre-printed label range varies from removable paper labels to laser etched steel tags, printed to your design and available with adhesive or fixing holes depending on your requirements.

Applications include:

- **Racking and pallet labels** – including barcodes, QR codes & unique numbering.
- **Asset Labels & Tags** – sequentially numbered & barcoded bespoke labels.
- **Hospitality Labels** – QR codes, wristbands, receipts & tickets.
- **Laboratory Labels** – chemical resistant and cryogenic labels.
- **Food Packaging Labels** – bottle, carton and food safe labels.
- **Automotive Labels** – VIN labels, compliance plates and tamper evident labels.
- **Product Labels** – information labels and warning signs.

With over 40 years of experience in manufacturing labels, our Sales Team will share their expertise with you, including design, printing methods, material options and adhesive performance, to ensure that you get the labels most suited to your particular application. Whether you are in retail, food production, manufacturing, transport or defence, we can provide reliable quality labels to meet your industry compliance requirements and standards.
